

POWERED BY ARTIFICIAL INTELLIGENCE

The SICAT RAPID DIGITALGUIDE is a digital implant surgical guide design for immediate 3D printing, created based on your implant planning and powered by state-of-the-art artificial intelligence technology.

Turnaround of **less than 20 minutes**

Ready-to-print **automatic design**,
tooth supported for most cases

Only **\$ 19.90** for the final STL design file

- ✓ Available for SICAT Implant V2.01 or higher + SICAT Implant Database Version 2.0 Update 3 or higher.
- ✓ The final STL design file will be uploaded to your SICAT Portal account from where you can download it for in-office printing.
- ✓ If you are unsure about your implant plan you can always select the SICAT **DIGITALGUIDE** for which your case and the design is reviewed by a SICAT expert.
